

Quality Manager Europe

Multi-Wing Motors and Drives, Randers, Denmark

About Multi-Wing Group

Shaping airflow for future generations! This is the mission of the Danish company Multi-Wing Group – a world leader in custom-designed axial fan solutions. The company started in Vedbæk north of Copenhagen in Denmark and has developed into an international company with a global presence. Today, Multi-Wing has around 450 employees located in Multi-Wing companies around the whole world. Being the world's leading expert and dedicated manufacturer of tailor-made axial fans, Multi-Wing has designed products and services for radiator and engine cooling, ventilation, air conditioning, heating and refrigeration markets all over the world for more than 60 years. Multi-Wing's engineered axial fans are comprised of various blade and hub configurations, based on each application's performance requirements. The key to success is Multi-Wing's innovative modular system that allows the creation of a very wide range of axial fans tailor-made for the client's specific needs.

You will be part of the newly established Multi-Wing Motors and Drives internal motor and drives competence center, highly specialized in developing customised and high-efficient AC and PM electric motors and variable speed drives.

The role

With reference to Multi-Wing Motors and Drives director you will be responsible for ensuring that quality goals and policies meet the company's requirements. You will be responsible for quality planning, quality assurance, quality control, and quality improvement. The main responsibilities are within the following areas:

- Develop and maintain Quality Management System (Quality Control processes, standard procedures, and instructions)
- Prepare organization for ISO9001 certification and maintain related activities
- Develop and maintain Inspection sheets in close cooperation with R/D and Quality Inspector
- Support manufacturers regarding implementing methods to inspect, test and evaluate products and production equipment
- Ensuring that products adhere to quality standards and applicable compliance requirements
- Performing detailed and recorded inspections of final products so the products are up to industry and company specifications and standards
- Ensure effective and fast handling of customer claims
- Drive continuous quality development of OEM factories
- Manage routine quality activities in Europe and Asia
- Perform and support system / process audits and follow findings

What qualifications are we looking for?

- You have a degree within mechanical/electrical engineering or similar and +5 years of experience within quality related areas, preferably in an international company.
- Extensive knowledge and work experience on problem solving methods (8D, Six Sigma, Lean manufacturing skills)
- You are not afraid of being hands-on and involving yourself in daily tasks as well as larger projects
- Good knowledge on APQP, PPAP, FMEA (CTP, CTQ), SQA.
- Solid computer skills, including MS Office (Word, Excel, PowerPoint), Minitab knowledge welcome
- Knowledge on electric motors AC and PM, variable frequency drives and electronics
- Highly structured, analytical, fact & detailed oriented
- Good supplier/customer relation skills

- Organized and with good sense of urgency and prioritization
- Openness for knowing different cultures
- Good communication and interpersonal skills
- International experience managing a cross-cultural team

We offer you:

- A challenging job in an international company
- Possibility to work from home
- A strong corporate brand and identity in the market
- Cooperation with market leading suppliers and customers
- Modern multicultural company

Expected travel time of around 30 working days per year.

We look forward to receiving your application and CV + other relevant documents (Word/pdf format).

Applications will be treated as confidential information.

Start date: ASAP

Applications must be sent by mail to ja@multi-wing.com
